

# VA Custom Application Registration Form

(VA Software Assurance Program Office Form, effective 24 August 2016)

This form **MUST** be used to determine whether a system should be registered with the VA Software Assurance Program Office and become part of the inventory of VA custom applications. These criteria apply to both systems in development and operational status. This form must be used for **ALL** VA employee and contractor requests to register systems with the VA Software Assurance Program Office. You **MUST** complete **ALL** questions unless otherwise identified on this form.

For more information about the VA Software Assurance Program Office, please see <https://wiki.mobilehealth.va.gov/display/OISSWA>

## Notes for completing this form

- All custom-developed applications, or custom-developed modules if the application/system is a COTS-based solution, must be registered with the VA Software Assurance (SwA) Program Office in order to obtain a unique Application-ID. Application-ID's are provided by the VA Software Assurance Program Office upon successful completion of the registration process.
