Secure Coding Tips

Tip: Quick Scan Mode May Leave Vulnerabilities Undetected

This week's Secure Coding Tip is about enabling quick scan mode when using the HP Fortify Static Code Analyzer (SCA) software. Scanning source code to perform code review is an authorization requirement included in the Technical / Testing Requirements of the OCS Accreditation Requirements Guide / SOP [1], and enforced as part of the ATO issuance process.[2]

One of the top 10 issues[3] encountered by VA application developers using the HP Fortify SCA software is enabling quick scan mode during a scan.[4] Quick scan mode only looks for a subset of the applicable vulnerabilities in the scanned application. Many issues are as a result not included in the results, including vulnerabilities that may be of high or even critical severity.

There are several steps you can take to resolve the issue. [Read more...](#)
