

# Announcing Software Assurance Training Schedule & Registration

## MESSAGE FROM THE OIS SOFTWARE ASSURANCE PROGRAM OFFICE

The VA Office of Information Security (OIS) **Software Assurance Program Office** is pleased to announce the availability of the following two virtual courses:

- **Fortify End User Training (2 Days)** – How to use the HP Fortify Static Code Analyzer (SCA) tool
- **Secure Coding Training (3 Days)** – Secure programming using the HP Fortify SCA tool

The HP Fortify SCA tool supports C/C++, .NET languages, Java, Objective-C, and other programming languages, with the exception of MUMPS and Delphi.

VA application developers are required by the VA OIS Certification Program Office (CPO) to scan their own source code both during development and during the Assessment and Authorization (A&A) process. These courses will assist developers to meet VA's requirements, policies and **OIS Secure Code Review Standard Operating Procedures (SOP)**.

The following training schedule has been established, all classes are virtual:
