

# CAE-277: Quality Standards and Programs (10A4B)

This page has been made public for vendors

## Abstract

The VA application is being developed and maintained by Quality Standards and Programs (10A4B).

## Explanation

Quality Standards and Programs (10A4B) promotes the integration and alignment of health care regulatory and governance strategies. Key accreditation, mission readiness, and ISO-9001 emphasis functions work together to promote further integration with clinical and business compliance programs and to better direct consultative and education resources to high-risk areas while avoiding needless survey burden on facility operations.
