

CAE-427: Health Information Governance/10P2C (HIG)

This page has been made public for vendors

Abstract

The VA application is being developed and maintained by Health Information Governance/10P2C (HIG).

Explanation

HIG represents VA on national and international health care policy initiatives regarding Veterans' data. HIG serves as VHA's subject matter and policy expert regarding privacy, health care security, and on data contained in Veterans' electronic health records (EHR) and in national data systems. Other functions include compliance monitoring, management of national data systems, and knowledge-based library services. HIG also develops and implements privacy and FOIA policy and regulations in accordance with the FOIA, Privacy Act, Title 38 confidentiality statutes and HIPAA Privacy Rule.
