

Technical Notes

Register your application, request VA-licensed Fortify software, training, and support [HERE](#)

This page has been made public for vendors

The VA Software Assurance Technical Notes span the areas listed below. Technical Notes include those about using the HP Fortify SCA tool to scan custom-developed VA source code, and other information that may be of potential assistance to the VA software development community. For announcements, please click on the link at the top of this page, to navigate to the VA Software Assurance Support Site Blog. Click on the links below to explore individual areas, or search based on keyword using the Search Technical Notes on this page.

- [1. Requesting VA Software Assurance Program Office Services](#)
- [2. Getting Started With Fortify](#)
- [3. Troubleshooting Fortify](#)
- [4. Common Fortify Scan Issues](#)
- [5. Advanced Fortify Topics](#)
- [6. Clarifications For Guidance Provided By Fortify](#)
- [7. Microsoft Threat Modeling Tool](#)

Fortify version-specific issues that have been identified by the VA Software Assurance Team are reported on the [OISSWA Blog](#).
