

HP Fortify Software Download Site Issues Resolved

HP software support contract ID (SAID) issues have been resolved.

The SAID is used by VA developers to download VA-licensed HP Fortify Static Code Analyzer (SCA) software from the HP Fortify software download site ([HP Software Support Online](#)).

VA developers can resume downloading the VA-licensed Fortify software from the [HP Software Support Online site](#) according to VA procedures.

For information about requesting Fortify software, please see the [FAQ](#).
