

How to open an NSD ticket to request Fortify software

This page has been made public for vendors

Question

How do I open an NSD ticket to request Fortify software?

Answer

If you have already successfully requested a license through the VA Software Assurance Program Office, to update the HPE Fortify SCA software to a newer release, you should **not** use the form on this page to request the software again. You should follow the instructions provided originally to download the new release, which are reproduced [HERE](#).

To obtain a VA license for the HPE Fortify SCA software for the first time: If you are a contractor, first fill out the usage agreement [HERE](#). Otherwise it is not necessary. Then submit the request form [HERE](#)
