

Announcing Fortify Software Version 16.1

The purpose of this announcement is to communicate to VA developers and contractors that a new version of the Fortify software has been released, version 16.1

VA developers and contractors should upgrade to the newest version at their earliest opportunity.

The most recent version of the Fortify software, and the complete, most recent set of the Fortify rulepacks must be used when scanning code.

Release notes can be viewed [here](#).

For information about requesting Fortify software, please see the FAQ [here](#).

| Note the change in Fortify software versioning to a YEAR.RELEASE structure.
