

Announcing OIS Static Application Security Testing (SAST) Tool Training

Announcement Date: March 27, 2014

MESSAGE FROM THE OIS SOFTWARE ASSURANCE PROGRAM OFFICE

The VA Office of Information Security (OIS) Software Assurance (SwA) Program Office is pleased to announce the availability of Static Application Security Testing (SAST) Tool training for VA Application Developers, including contractors. The training is being made available agency-wide at no cost on-site at certain VA facilities and also online, via webcast.

2 Days with hands-on testing

Students will learn about using the HP Fortify Static Code Analyzer (SCA) SAST tool to perform automated scans of their source code during development and in support of the Assessment and Authorization (A&A) process. Through a combination of presentation and demonstration, you'll learn to how to perform scans to find vulnerabilities. The training uses the latest version of the HP Fortify Static Code Analyzer (SCA) SAST tool.

For more information about upcoming training dates and locations, or to request training at a VA facility, please reply to this email. Please include your name, email address, and VA organization to which you belong or to which you are providing systems development support. Please feel free to forward this information as might be appropriate.
