

How to open an NSD ticket to register a VA application

This page has been made public for vendors

Question

How do I open an NSD ticket to register a custom VA application with the VA Software Assurance Program Office?

Answer

First fill out the custom-developed application registration form [HERE](#). Then submit the request form [HERE](#)

Additional notes:

- An upload directory to later use to upload Fortify .fpr scan file(s) and zip(s) of scanned code as the first step of the code review validation process will be provided upon completion of registration
- Custom developed VA applications registered with the VA Software Assurance Program Office, per "Software Assurance Program Memorandum" (VAIQ #7477488), signed by Stephen Warren, on April 10, 2015.
- Registration is necessary to maintain an inventory of the total population of VA custom applications, by type and business line according to the VA Common Application Enumeration (CAE) to ensure application-level security considerations are taken into account when determining readiness and performance
- COTS is not subject to the VA Software Assurance Program Office registration process, although custom-developed modules to extend or modify COTS functionality is subject to registration.
- Applications written in Delphi, MUMPS, and COBOL are not subject to the VA Software Assurance Program Office registration process.
